

Grand Valley Construction Association Education

Asbestos in Construction

Upon completion, participants will be able to identify locations where asbestos may be present and find sections of the asbestos regulation which deal with the classification of asbestos work. They will also be able to recognize potential control options and establish procedures based on the type of asbestos hazard.

Topics include:

Asbestos uses and locations in construction Health hazards and controls legislative requirements.

Note: This course does not qualify participants for Type 3 asbestos removal. As of November 2007, every worker and supervisor involved in Type 3 operations must successfully complete the Asbestos Abatement Training Program approved by the Ministry of Training, Colleges and Universities.
