CCA Mould in Construction

The existence of mould in new construction and renovation has become one of the "hottest" topics in litigation. What are the problems associated with mould? Do we need to care about worker exposure to mould? Why has it become such a "hot" topic in recent years? Subcontractors - what is their responsibility? What can be done to limit growth? The Canadian Construction Association set up a task force to address these issues and, as a direct result, developed a course to specifically address topics about Mould in Construction.

Presented by: GVCA

Instructor: Ellaline Davies, Safety Works Consulting Inc.

When: Friday, Dec. 7, 2007 9:00 – 4:00 pm
