System Building Detailer and Shop drawings using Tekla BIM Technology

Where innovation, technology and integrity come together.

Our purpose at Newton Group is to excel in delivering turnkey sustainable factory manufactured integrated building systems to meet the requirements of our customers. Our building systems are economically priced durable buildings with focus on, high quality and reduced embodied carbon, energy use intensity and maintenance costs. Designing and manufacturing an integrated building system allows these attributes to come together economically to provide structures in the ICI building industry and residential industries. We strive to make and improve better products pushing towards economical sustainable solutions for the buildings of tomorrow. We develop our people to work together with various skills and working with a purpose towards constructing great sustainable buildings using our latest technology. We believe that a truly inspiring and diverse place to work is a must. We want you to join our team of passionate self-starters who believe the world is full of untapped opportunities. If you wish to contribute to the solution of net zero, sustainable, zero carbon and to reduce embodied carbon and the negative effects of buildings on the environment we are your place to build a career. We continue to expand and have an exciting opportunity for a System Building Detailer and Shop drawings specialist.

Training;

Tekla BIM software by Trimble skills and experience are critical for this applicant.

We will train you on our system buildings so long as you are keen, able to think critically, have Tekla BIM training and experience from College, University or work experience.

Responsibilities

- Using the Kiwi Building systems and designs provided and the Tekla software detail the building in the 3 D model
- Work with engineering and project management teams to refine and perfect the model gaining their approvals before making shop drawings
- Use the computerized technology to generate your shop drawings and material lists for manufacturing
- Continuous improvement collaboration with manufacturing and engineering

Skills, Knowledge, Qualifications & Experience

- Training in Tekla BIM software at University, College or work experience
- Critical thinking ability and attention to detail
- Experience with Tekla
- A high level of software competency through on-going use

- An understanding of established building codes and standards will give you an advantage.

Newton Group encourages people to enjoy work and working with others, to be creative and effective in teams, to be reliable for other team members and to develop efficient work habits to serve customers well and deliver best value excellent buildings and structures.

Newton Group is an Equal Opportunity Diverse Employer and welcomes all applicants who consider themselves qualified.
